EDUCATION

M.Sc., Computer Science, McGill University, Montreal, QC *2013–present*

Advisor: Joelle Pineau. Specialization in robotics, machine learning and computer vision.

B.A.Sc., Systems Design Engineering, University of Waterloo, ON *2008–2013*

Minor in German. Cumulative GPA: 87.0.

Study Abroad Semester, Technische Universität Braunschweig, Germany *Oct, 2011–Mar, 2012*

Completed full engineering course load in foreign language.

ACADEMIC RESEARCH EXPERIENCE

Graduate Researcher 2013–present

McGill University *Montreal, QC*

- Developing people tracking and following techniques for an autonomous powered wheelchair. Emphasis on fast prototyping of state-of-the-art techniques and testing/breaking existing algorithms in the real-world to focus research on areas of highest practical impact.

Undergraduate Research Assistant May–Aug, 2011

University of Waterloo *Waterloo, ON*

- Performed background literary research on the simulation of muscle fiber action potentials. Applied this knowledge to update an existing Visual C++ simulator.

Undergraduate Research Assistant Sept–Dec, 2010

University of Waterloo *Waterloo, ON*

- Created a novel method for comparing image noise reduction and estimation techniques. Described our methodology, results and recommendations in a paper, which was accepted to a refereed conference.

PUBLICATIONS

A. Leigh and J. Pineau, “Laser-based Person Tracking for Clinical Locomotion Analysis”, *IROS Workshop on Rehabilitation & Assistive Robotics*, Chicago, Illinois, USA, 2014.

A. Leigh, A. Wong, D. A. Clausi and P. Fieguth, “Comprehensive analysis on the effects of noise estimation strategies on image noise artifact suppression performance”, *IEEE International Symposium of Multimedia*, Dana Point, California, USA, 2011.

WORKS SUBMITTED OR UNDER REVIEW

A. Leigh, J. Pineau, N. Olmedo and H. Zhang, “Person Tracking and Following with 2D Laser Scanners”, *Submitted to the International Conference on Robotics and Automation (ICRA)*, submission number: 1523, date submitted: Oct. 1, 2014.

INDUSTRY RESEARCH AND WORK EXPERIENCE

Robotics Engineering Student Developer

Siemens Corporate Research and Technologies

Apr–Aug, 2012

Munich, Germany

- Developed a simulated robotic model of a new concept of electric car using C++, Robot Operating System (ROS) and Unified Robot Description Format (URDF). Researched and implemented low-and high-level control systems for driving and steering, including a non-holonomic trajectory follower to allow for autonomous driving.

Systems Design Engineering Student

Durridge Co.

Jan–Apr, 2011

Billerica, MA, USA

- Developed electrical components of a novel Radon-detection device. Exercised best electrical engineering practices when working with an extremely sensitive voltage amplifier. Developed and reviewed electrical schematics in EAGLE. Wrote and maintained firmware in C. Placed product orders with manufacturers.

Design Engineering Student

Automation Engineering Associates

May–Aug, 2010

Toronto, ON

- Designed, coded, tested, and troubleshoot control programs for automating commercial and residential heating, cooling and ventilation systems.

.NET Programmer

Human Resources Canada

Sept–Dec, 2009

Ottawa, ON

Engineering Assistant

Hatch Ltd.

Jan–Apr, 2009

Mississauga, ON

TEACHING EXPERIENCE

Teaching Assistant

COMP-598: Applied Machine Learning

2014

McGill University

- Delivered guest lecture on online learning.

AWARDS

Graduate Research Award

Tenured at McGill University

2014

McGill Graduate Excellence Award

Tenured at McGill University

2013

NSERC Canada Graduate Scholarship - Master's

Tenured at McGill University

2013

Ontario Graduate Scholarship

Not tenured

2013

Best design project of 4th year engineering class (tied)

2013

Wilfred L. Bitzer Award

For outstanding exchange students to Germany

2011

Engineering President's & Entrance Scholarships

Tenured at the University of Waterloo

2008

Queen Elizabeth II Provincial Scholarship

Tenured at the University of Waterloo

2008

VOLUNTEER EXPERIENCE

Robotics Competition Referee

First Lego League

Mar, 2014

Montreal, QC

- Observed matches to ensure fair play and a smoothly operating tournament. Single day.

Bicycle Shop Assistant

University of Waterloo

2012–2013

Waterloo, ON

- Responsible for the university's student bicycle shop for two hours per week. Helped customers in a fast-paced environment and used my bicycle repair expertise to mentor them on various bicycle repair techniques.

SKILLS

Programming	C++, Python, MATLAB, C (firmware)
Robotics	ROS, OpenCV, Gazebo, URDF
Computer	Linux, Git, L ^A T _E X
Languages	English (native), German (fluent but rusty), French (intermediate)

HOBBIES

Acoustic guitar, sports, building and flying radio controlled planes, catamaran sailing and bicycle touring (two months from Vancouver, Canada to Tijuana).
